For: CLOSED LOOP MEDICAMENT PUMP	)	Confirmation No.: 6454

**RESPONSE TO RESTRICTION REQUIREMENT**

Assistant Commissioner of Patents  
 Alexandria, VA 22313-1450

Sir:

This paper is responsive to the Restriction Requirement mailed December 11, 2007. The Examiner set a one-month period for response, thus this response is being timely submitted and no fee should be due. However, should a fee be due, the Office is authorized to charge such a fee to Deposit Account No. 19-0733.

**Election**

In response to Examiner's Restriction Requirement, the Applicant thanks the Examiner for the attention to this application and elects claims 14 through 43. The applicant also draws the attention of the Examiner to points said in the applicant's preliminary amendment, as follows:

"Application claim 14 is '663 patent claim 1, which included iontopheretic sensing, with application claim 14 further including the additional limitation that the sensor module comprises a sampling system and a concentration determining system. A claim such as application claim 14 was not issued in the '663 patent because '663 patent claim 1 had no dependent claims.

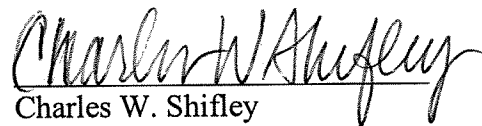

Additional application claims 15 – 20, which are dependent on application claim 14, parallel patent claims 5-10, which were dependent on patent claim 2. Additional application claims 21 – 41 are directed to additional limitations taken from the specification. They depend from application claim 14 and its dependent claim 20. Additional application claims 42 and 43 direct themselves to the subject of application claim 14 with additional limitations directed to glucose detection and insulin delivery."

### **Conclusion**

The Applicant reserves the right to prosecute the non-elected claims in one or more divisional applications. Should the Examiner have any questions, the Examiner is invited to contact the undersigned at the number set forth below.

Respectfully submitted,

Dated: January 11, 2008
